

## AwnTex® 120 Open Weave Awning Fabric

Outdoor shades made with solar screen fabric make living spaces more comfortable, reduce energy costs and offer privacy without blocking the view. For products where permeability is key and vibrant color is important, Superior Awning uses tough, durable AWNTEX® brand fabric. For moderate shade needs, we recommend AwnTex® 120, a PVC-encapsulated polyester mesh fabric with a shade factor of 90%. Resistant to flame, mildew and solar fade, AwnTex® 120 fabric is backed by a 5-year manufacturer's limited warranty.
